

To Whom It May Concern,

Our company currently uses the Focus system in five locations. We find the Focus software to be unparalleled in ease of use and functionality. The hardware is durable and dependable. With any POS system the purchase and set-up is just the beginning. What really counts is the service. We have found our area service technician to be outstanding. This tells me that Gulf Hospitality Systems, Inc. has high standards and trains their people well. I would highly recommend this company to anyone looking for a quality POS system.
